

Duong Thanh Phung

Game Developer

Phone: +84368948121/ Email: thphung2@gmail.com

Portfolio: <https://finn191.github.io/thanhphung-portfolio/>

SUMMARY

Unity Developer with nearly 1.5 years of experience in **WebGL game development**, focusing on gameplay systems and performance optimization. Experienced in client-server gameplay and iterative feature development. Currently exploring **mobile puzzle/casual games** with a focus on game feel and player experience.

TECHNICAL SKILLS

Programming Languages: C#, JavaScript, TypeScript

Game Engines: Unity, Cocos Creator

Multiplayer/Realtime: Colyseus, WebSocket

Databases: PostgreSQL, MySQL

Version Control: Git

AI-Assisted Development: ChatGPT, Gemini, NotebookLM, Cursor, GitHub Copilot

Others: OOP, SOLID principles, common Design Patterns

EXPERIENCE

Cozy Market (Personal Project) – Game Developer (Unity | Mobile) 4/2026

- **Description:** A casual puzzle game where players match items to clear shelves while avoiding obstacles.
- **Responsibilities:**
 - Designed and implemented core gameplay loop and level system
 - Improved **game feel** through UI feedback and visual effects
 - Optimized performance using **object pooling** and **event-driven logic**
 - Maintained stable 60 FPS on mobile devices

RYG.Labs – Game Developer (Unity | WebGL) 10/2024 – 03/2026

- **Responsibilities:**
 - Translated game design concepts into scalable gameplay systems and features
 - Proposed and refined gameplay ideas to improve player experience
 - Collaborated with backend team on data flow and real-time synchronization
 - Iterated on gameplay features through testing and feedback
 - Implemented gameplay features and optimized performance for WebGL

Project 1: SunnySide Acres

- **Description:** A multiplayer farming simulation inspired by Stardew Valley, featuring real-time player interaction.
- **Responsibilities:**
 - Developed core gameplay systems and player movement in a real-time multiplayer environment
 - Implemented client-server synchronization using Colyseus
 - Collaborated with backend team to design data flow for player interactions

Project 2: StarkMine

- **Description:** An idle game where players obtain aircraft through a gacha system to collect resources and upgrade progression.
- **Responsibilities:**
 - Built core gameplay loop (gacha → resource → upgrade) for an idle progression system
 - Implemented progression mechanics and resource scaling
 - Integrated gameplay systems with backend for reward handling and state updates

Nong Lam University (Cocos Creator | WebGL)

02/2024 – 08/2024

Project: NLU Exploration

- **Description:** A multiplayer pixel-art simulation of Nong Lam University, used as a campus introduction tool.
- **Responsibilities:**
 - Built gameplay systems and real-time interaction
 - Contributed to frontend and backend architecture
 - Implemented gameplay systems for multiple player roles

EDUCATION

Nong Lam University, Ho Chi Minh City

2020-2024

- Major: Information Technology
- GPA: 7.52/10

HONORS & AWARDS

Second Prize – "NLU Students with Scientific Research Ideas" Competition (2023).
